

# Restylane

Ask your physician how Restylane® products  
can help you get the result you want.

Restylane® treatments should always be  
performed by a trained practitioner.

# Restylane SubQ™

Instantly brings out the best in you

*Restylane*  
NATURAL BEAUTY MADE IN SWEDEN

# Restylane® — a facial beauty treatment

With over nine million treatments worldwide since 1996, Restylane is one of the leading brands. The Restylane product portfolio comprises six products for facial beauty treatment specially designed to rejuvenate, fill out folds and wrinkles, contour and create volume.

**Restylane SubQ™ is specially designed for volumetric contouring of the facial features to create excellent facial definition.**

Restylane SubQ is a clear gel based on non-animal hyaluronic acid (HA). HA is a naturally occurring substance in the skin and as it depletes over time, the consequence is loss of facial fullness. The treatment is ideal if you are looking for sculpted facial contours, such as the chin and cheeks, or wish to enhance your features.

Treatments with Restylane SubQ require only a short downtime and deliver safely and instantly the volume needed to achieve a smooth lift, with optimal results. And the beauty of it is you can see the improvement in your facial contours immediately. The result is long-lasting, but not permanent, so you can vary the treatment as often as you want. The various products available in the Restylane family will help you achieve the look you want.

Restylane SubQ instantly brings out the best in you. Once you've tried it, you'll see its visible appeal in an instant.

Achieves instant, natural-looking results

Cheek definition  
before enhancement

Cheek definition  
after Restylane SubQ™

Sunken areas through  
loss of fatty tissue

Volume restored with
